

# Mid-Term Meeting

Interreg Austria – Czechia Project „Groundwater / Podzemní vody“ ATCZ00067

9 September 2026 (10:00 – 15:00)

## GeoSphere Austria

Neulinggasse 38, 1030 Vienna  
3rd Floor, New Building, Conference Room 3.35.00

## Programme

| Time                 | Topic                                                                                                                                                                                                                             | Presenter                              |
|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|
| <b>10:00 – 10:15</b> | <i>Welcome and Opening Remarks</i><br><br>The Main Goals of the Interreg Project<br>Sustainable Groundwater Management in the<br>Czech-Austrian Border Region.                                                                    | Leichmann/MU,<br>Schubert/GSA          |
| <b>10:15 – 10:35</b> | Geology of the Alpine-Carpathian Foredeep<br>Basin in relation to the hydrogeological rock<br>properties                                                                                                                          | Nehyba/MU,<br>Opletal/MU,<br>Retzl/GSA |
| <b>10:35 – 10:55</b> | <i>Overview of Project Progress and Results Achieved<br/>During Year 2 in Austria</i><br><br>Hydrological Balance of Monitoring Stations in<br>the Austrian Project Area in Austria and<br>Classification of the Current Drought. | Schubert/GSA,<br>Waitzinger/GSA        |
| <b>10:55 – 11:15</b> | The Groundwater Conditions in the Project Area<br>in Austria: Geological and Hydraulic Properties<br>of the Aquifers.                                                                                                             | Retzl/GSA,<br>Schubert/GSA             |
| <b>11:15 – 11:35</b> | Additional Geophysical Underground Soundings<br>to Understand Potential Aquifers.                                                                                                                                                 | Schlögl/GSA,<br>Schubert/GSA           |
| <b>11:35 – 12:20</b> | <i>Lunch Break</i>                                                                                                                                                                                                                |                                        |

|                      |                                                                                                                                                                                                |                                             |
|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|
| <b>12:20 – 12:40</b> | <i>Overview of Project Progress and Results Achieved During Year 2 in CR</i><br><br>Geochemistry of Groundwater from Springs, Shallow and Deep Wells as a Basis for Hydrogeological Modelling. | Zeman/MU                                    |
| <b>12:40 – 13:00</b> | Climate 2D Model and Surface Runoff: Groundwater-Surface Water Interactions, Progress and Preliminary Results                                                                                  | Musilová/ČHMU                               |
| <b>13:00 – 13:20</b> | Climate 2D Model and Surface Runoff: Climatological Conditions, Progress and Preliminary Results.                                                                                              | Zemanová/ČHMU                               |
| <b>13:40 – 14:00</b> | Assessment of Changes in Cross-Border Aquifers: Groundwater Levels and Spring Discharge.                                                                                                       | Ricka/MU,<br>Pasternakova/MU,<br>Vanicek/MU |
| <b>14:00 – 14:20</b> | Isotopic Indicators of Groundwater Recharge.                                                                                                                                                   | Kuchovsky/MU                                |
| <b>14:20 – 14:40</b> | Coffee Break and Discussion on Upcoming Activities and Planned Outputs.                                                                                                                        | all partners                                |
| <b>15:40 – 15:00</b> | Conclusions and Closing Remarks                                                                                                                                                                | Leichmann/MU,<br>Schubert/GSA               |

Refreshments and coffee will be provided throughout the meeting.
